Bellevue, WA 98008-5452

Let's talk about  
the implications of  
this. Dennis

Dear Mr. Johnson:

Subject: Interrelated Facilities - Pollution Prevention Plans

Reference: Letter R-6570-LMB-498, June 18, 1991, L. M. Babich to D. Johnson, Interrelated Facilities - Hazardous Waste Reduction Plans

Changes in Boeing Renton Division's pollution prevention planning and reporting activity are necessary to reflect recent realignment and consolidation of Boeing activities at several sites.

The organizational and location changes that have occurred are:

- 1) Boeing Propulsion Systems Division activities have been entirely transferred from the Robbins site, WAD980987846, to the Thompson site, WAD980982912, formerly used for B-2 bomber production. The B-2 activity was discontinued in 1994, as reported in the 1994 Annual Progress Report for the Thompson site.
- 2) All Boeing production activities at the Robbins site were terminated as of December 21, 1994. The property is currently being prepared for return to the lessor. Application will be made for cancellation of the EPA/state dangerous waste identification number for this site in the near future.

As a result of these realignments, the following changes in pollution prevention planning and reporting are forwarded for your review:

The Thompson site will replace the Robbins site in the interrelated facility plan for the Renton, North Boeing Field and Robbins sites, ID number IRF178005030. The reference letter provided the

original information upon which approval was granted to treat these sites as interrelated. As noted above, all and only those activities formerly carried out at the Robbins site are now carried out at the Thompson site. Separate reporting will be discontinued on the Thompson site, WAD980982912. Planning and reporting for the Robbins site will be discontinued.
